

Snare

The EN Snare® Endovascular System is a multi-loop snare intended for use in the cardiovascular system or hollow viscus to retrieve and manipulate foreign objects.

The ONE Snare® Endovascular System is a single-loop snare designed to provide both accuracy and reliability for effective foreign body manipulation and retrieval.

EN Snare® Endovascular System

Sold individually and includes a snare, torque device, introducer and snare catheter. Snare and catheter packaged separately.

The EN Snare® is designed to expand to vessel wall size for retrieval of hard to get side-walled objects.

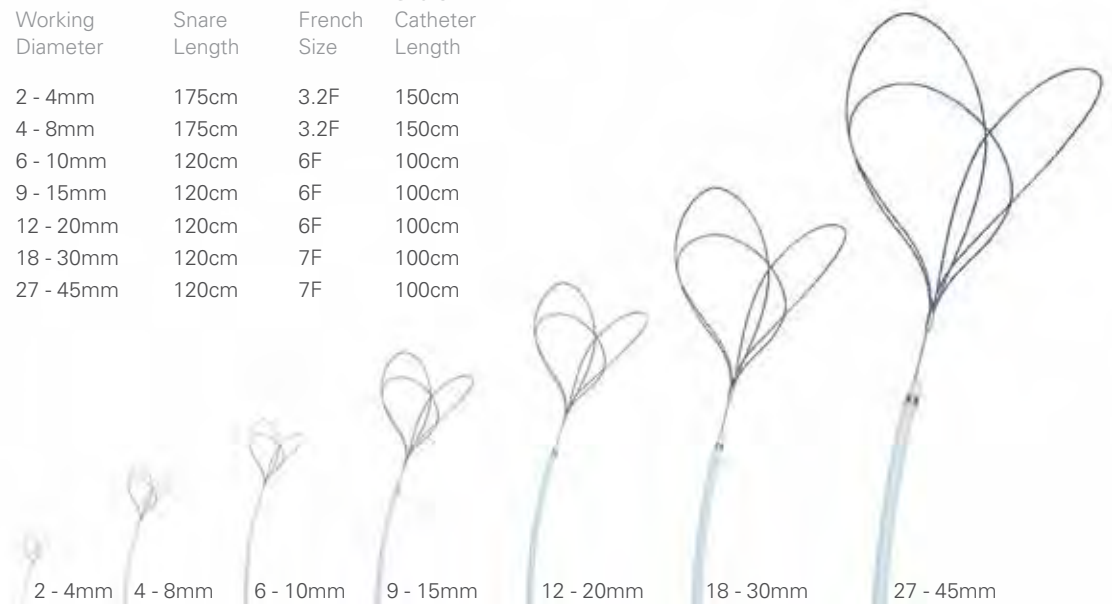

The EN Snare® is designed with three loops to increase the probability of foreign body capture.

Interlaced Nitinol loops provide structural integrity when capturing objects.
